

Save Time by Keeping Parents, Students and Staff Informed and Up-to-Date

X-on Voicebank is the ideal Messaging and Noticeboard Service for School Administration.

We currently supply high quality Voicebank to over 60% of the UK Police Forces!

We also provide for Schools, Fire Services, the NHS, Utilities, Councils, plus other Community Services and Business Sectors.

Voicebank is a 'Noticeboard' messaging service that allows Teachers and staff to leave messages for parents to call in and listen to.

Potential Voice Message Uses

- Updating school events timetable
- Emergency school closure details
- General school information
- Results of Schools Sporting Events
- Changes to after school activities, clubs cancelled/late back from fixtures
- Examination Timetables
- Issues with school transport/bus times etc.
- Up to date return times for school trips
- Press releases for local journalists
- Reminders to parents

The messages can be recorded remotely by anyone with the passcode using any touch tone land line or mobile phone. If you can use a phone, you can leave a message - no training needed.

Main Features

- Voicebank is a simple to use service with messages updated by phone and administration via a web interface
- Remote recording access from any touch tone Landline or mobile with a passcode
- Hosted service so no specialist equipment or phone lines are required on site
- Reducing the number of unnecessary calls to the main school office
- Large numbers of callers can call the service to hear information at the same time so there are no engaged tones or waiting to get answered
- Messages can auto delete after a period of time or be manually deleted
- Callers can use their phone keypad to skip forward and back to hear previous messages
- No maximum limit for the length of recording
- Web interface for easy administration/reports
- Low cost fixed monthly price
- Extensively proven technology

X-on Voicebank is a Hosted Service negating the need for purchasing or maintaining an expensive in-house solution or needing dedicated lines on-site. Our systems can handle a large number of callers simultaneously.
