

## Extension - Patient Call PA

The PA extension provides everything you need for a complete, easy to contact patient PA system allowing any telephone extension within your surgery to broadcast to reception through the amplified speaker.

### Complete System

We will supply you everything you need including the amplifier and the speaker. We will also install the system for you which will be done quickly and easily by one of our engineers. The equipment is under warranty for the duration of your contract.

### Simple Contact

Any telephone extension within your surgery can be configured to broadcast to the Patient Call PA Extension. Either by dialing a 3 digit short dial number or by pressing a specially configured key on the phone you can announce the next patient required or a general message to the people in the waiting area.

Should you need more than one PA system each can be contacted individually from the telephone extensions.

Feature	Description
Hardware	We supply and install the complete system so you don't have to source anything we will also replace any equipment under warranty for the term of your Surgery Connect contract.
Expandable	The supplied speaker should be more than adequate but if you feel you need more volume a standard PA speaker (not supplied) can be plugged into the device we supply.
Configurable	You choose which telephone extensions can contact the PA system via either dialing a 3 digit short dial number or by a single press of a key on the telephone.
Multiple PAs	Should you require 2 or more PA systems the telephones can be configured with separate buttons for each.
